# **e-Estonia: building a digital government**

**SIIM SIKKUT**

ICT Policy Adviser  
Government Office

**RIIGIKANTSELEI**

---

---

---

# Basic facts: e-Estonia today

- **80% of population** are internet users
- Internet access everywhere (100Mbps+ by 2017)
- **Strong eID** since 2002 (ID-card and mobile-ID)
- 136+ mln **digital signatures** to date
- ICT sector leads the economy

---

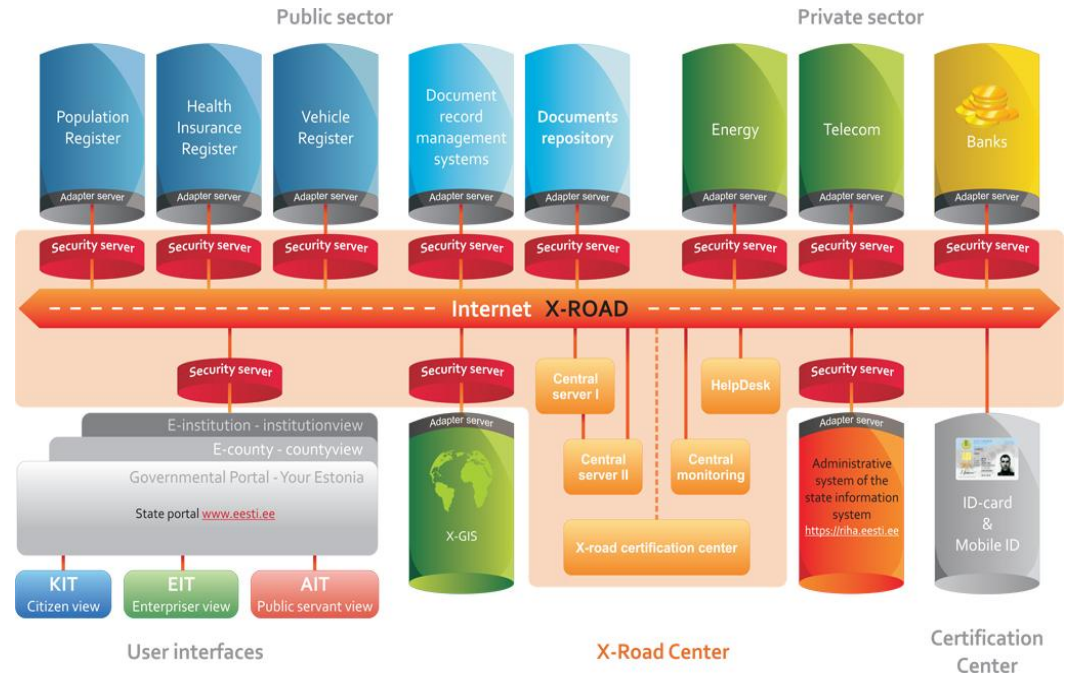

---

# **3 milestones of digital govt.**

- **18 min. to establish a company online**
- **96% of people declare taxes online**
- **25% of people vote online for parliament (2011)**

# Building blocks: for all to use

National eID and X-road: since 2002

---

# Government can lead the way

**e-Cabinet: paperless government since 2000**

---

---

# **Vision 2020**

**e-Estonia  
is a prime place  
to create and test  
smart e-solutions**

---

---

# Future: co-creation

The screenshot shows the homepage of e-estonia.com. At the top left is the logo for e-ESTONIA, 'The Digital Society'. Navigation links include 'e-Estonia', 'Components', and 'Case Studies'. A main banner features a woman and a police car with the headline 'Safer Streets Through Technology' and the subtext 'Serving and protecting with the help of e-Police systems'. Below this is a 'Welcome to e-Estonia' section with a paragraph describing Estonia's digital success and a 'Learn more' link. To the right is an 'About Estonia' section with a map of Estonia and another 'Learn More' link. At the bottom left, there are four boxes for 'Digital Society Components': 'Electrono ID Card', 'I-Voting', 'X-Road', and 'Mobile-ID'. At the bottom right is a 'Find us on Facebook' widget showing the 'E-Estonia' page with 597 likes and a grid of user avatars.

**Thank you!**

Go and check  
*e-Estonia* out  
yourself!
